EXPERIENCE

UI DESIGNER | SENIOR DEVELOPER
Health Care Logistics, Inc. | 2013 – Present

- I provide research, design, and development solutions and take ideas from concept to a final product. Some recent examples include:
  - Medication and supply solution which uses RFID labels, desktop scanners and handheld scanners to help manage the inventory in a hospital or pharmacy setting.
  - Medication storage monitoring which communicates with our devices that can alert to any changes in temperature, humidity or ambient readings in real time.
  - Medication labeling application that allows our users to create and print custom labels.
  - Marketing asset manager. Used internally by our marketing and sales departments to view, download, and request marketing materials.
- Recently re-developed a reusable UI component library which uses Vue.js and Tailwind. I redesigned and updated all components to use Vue 3 and used Cypress for component testing.
- Recently converted our medication monitoring storage site from Vue 2 to Vue 3.
- Designed, developed and maintain corporate site which is responsible for over $70 million in revenue from medical supply sales each year. Currently I'm redeveloping this site with the help of a third-party to support integration with our ERP system.
- Successfully migrated company Sharepoint intranet site from 2010 on prem server to current Sharepoint Online. Provide continued support internally.

IT SUPPORT | GRAPHIC DESIGNER | WEB DEVELOPER
2001 – 2013

- Developed corporate sites, print promotions and provided IT/Networking support.
